Attachments:	Parcel ID and Owner (1).xlsx

Hi Rob,

Thank you for the list of parcel IDs and names. I have taken such and modified by adding three columns and assessing using the Site Viewer the total parcel acreage, the acreage with potential tailings, and if the parcel is in or not in the OU boundary. Granted the polygon boundaries are potentially not perfect but this is a good approximation.

I do have a problem. There are parcels that I cannot find that are either potentially mislabeled or maybe an ID number was changed after the summit county parcel layer was imported. Is there any way to try and find the noted parcels in the attached list that I currently cannot find in the site viewer? There are 20 parcels out of the 98 total parcels on the list that I cannot find.

I will be in Tuesday and maybe we could catch up. I copied John on this email since he may have some magic he can work since he is the gatekeeper on the Site Viewer.
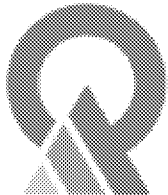

You both have a great weekend,

Doug
